**Please read the below statement about Education Freedom Accounts carefully:**

**"Legislators are considering a bill to let families choose to attend their local public school or apply for an Education Freedom Account. If a family chooses an Education Freedom Account, they would receive the student's state adequate education grant, approximately \$4,600 per student per year. Families then could use the Education Freedom Account only for state-approved education expenses, such as tuition to a public or private school, tutoring, textbooks and other educational materials, online education, college classes, and special education services"**

**Based on the above statement, would you support or oppose letting families choose a state-authorized Education Freedom Account?**
